

JUSTICE IS DUE

Emailed To: -

Madam President
Union of India

I will be dead when you read this. Given speaking against courts is impossible today for people who are alive, a dead man must speak.

I have watched a few of your speeches around Justice and over handedness of the Indian Judiciary for poor people. I don't see Justice in terms of poor or rich, man or woman etc. But still, I feel that you have a mind that understands the importance of **Unbiased Justice** in a democracy.

Also, you are an authority that is above the Supreme Court and have powers to do a lot of changes if you collaborate with Parliament. Today, the Indian judiciary has crossed all its limits and is trying to usurp powers of every entity without any accountability. India might become the first country to be under **Judicial dictatorship**. Few old uncles and aunties who are not democratically elected and are products of nepotism can't hold the entire society, tradition, culture and country hostage for their need to look good in the media while doing the least amount of work compared to any profession and getting asymmetrically high salary and benefits compared to their **poor performance in this poor country**. Today Indian courts have become the **breeding ground of open corruption**. If the current Indian Judiciary is justified by the constitution, then the constitution is evil and should be destroyed/changed. If the justification is democracy and society then this democracy and society is evil and should go down. But the Indian Judiciary can not be allowed to stay in its current state.

The very **Varna System** that India has tried so hard to remove is **raising its ugly head again** but in a much worse form. In this **new Varna System**, **Brahmins are these Judges** who keep on appointing their own kins which are **much more corrupt, privileged and lack respect for democracy and law**. They want to control everything. They will keep trying to mislead people with everything to keep their thrones safe. They have weaponized their positions of power to undermine everything we hold dear and respect including meritocracy, hard work, freedom, free speech, children, taxpayer's hard earned money, unbiased justice etc.

Indian Legal System is a FRAUD, a COMEDY, a PHANTOM, a BLACKMAIL

For Sushma

JUSTICE IS DUE

THE COLLEGIUM JOURNEY

HOW JUDGES ARE APPOINTED?

@ahmeryanalogia

I have few recommendations. I hope all politicians come together in this fight against the madness of the judiciary. If the **power hungry Judiciary** is not stopped and these few uncles and aunties of the Supreme court **usurp the powers of even parliament** of India, what will be the point of working so hard to get elected? So I think all politicians should fight this battle.

1. Self serving **Collegium system** should be banned completely. No other country has this. This is an abomination in any democracy. Any Judge trying to block this should be impeached without mercy. This will **free the high courts** too from clutches of the power hungry supreme court. Opposition can be involved in appointment of judges to dispel any fear of ulterior motives of the ruling government. But all parties should come together in this good initiative for the country and democracy instead of being shortsighted for their immediate political gains.

2. Indian courts should have the **same number of holidays and leaves** as any other government servant.
3. Post retirement benefits of all Judges should be limited to only pension just like any government servant. Security should be given as per need.
4. Judges showing clear biases and doing Judicial activism should be answerable to the right parliamentary committees in front of the camera. Judges who want to do activism should resign and join politics.
5. Corrupt Judges should not be jailed but hanged in public.
6. Incompetent and biased Judges should be fired.
7. All their public and extra-judicial statements should be considered for deciding if they are biased. All the public and extra judicial statements should be open for public criticism.

JUSTICE IS DUE

8. **Contempt of court powers** should be severely curtailed. **Truth and Freedom of speech** is way more important than saving the **corrupt, incompetent and inefficient judiciary**.
9. There should be a way to complain against corrupt judges and court officials without fear of retaliation.
10. State should automatically file a case against people who have filed false cases. Maximum amount of punishment should be given to people **filing false rape, POCSO and matrimonial cases**.
11. Fathers and grandparents should have default visitation rights. No access to the child, no money.
12. All gender based laws and institutions should be decommissioned or made as gender neutral. Welfare of male children can not be a part of The Ministry of Women and Child Development. Men and male children need a separate ministry.
 - a. <https://www.youtube.com/watch?v=BjclKl1NyCU>
13. These judges who are the most privileged and keep preaching that they are working in service to society should get only **median national per capita income** as salary, so that they understand the right value of money and walk the talk too. Then they will ensure that productive litigants don't waste time unnecessarily in court and will start thinking about boosting the economic progress of the country instead of wasting GDP of India. Taxpayers shouldn't pay for their vanity.
14. If you want to keep allowing false cases, extortion and harassment of husbands and their families, **at least allow legal euthanasia for the people**, so that greedy wives get all the money if husbands and their families don't burn their money before dying.

If this poor country wants to become prosperous, it needs to stop respecting these socialist & Idiotic laws, Marxist ideologies and institutions and killing the spirit of hard working people. Otherwise this country will become an example of a disaster at a scale the world has never seen before. The Unaccountable and irresponsible Judicial system is going to be the single biggest reason for the bad times that this country is going to have in a few decades at best and next decade at worst.
